

Robusta 550

PTO Centrifugal pump

Robusta 550

Description

End-suction centrifugal pump to be connected to the tractor PTO. Pump and hose have to be primed. Driven by the PTO-shaft of the tractor or by gear shaft. Use on clean or sewage water racking and light slurries extractions.

Applications

Used for irrigation with need of high flow, extraction of light slurries, cleaning of wells, racking sewage water, for venting and pumping out fishponds and wherever a large amount has to be pumped.

Specifications

Flow rate:	800 l/min - 48 m ³ /h
Pressure Hmax:	20 m
Suction Port:	60 mm
Pressure Port:	60 mm + 2" thread
R.p.m.	540
Power requirement:	6 kW
PTO:	male or female
Suction head:	5 m

Dimension

Lenght	300 mm
Width	250 mm
Height	250 mm
Weight	26 kg

Package Contents

- ◆ Foot Valve
- ◆ Hose Nozzle 60 mm
